Forecast for Thursday 05 May 2022

Weather: Mainly dry overnight with variable, sometimes broken cloud, and patchy hill fog. Cloud becoming more extensive in the morning bringing the chance of a few patches of light rain or drizzle and some hill fog. Then brightening up with some sunny intervals developing for a time in the afternoon before cloud increases later, though staying mainly dry in the evening with just a low risk of a light shower.

Chance of cloud-free hill tops above 700m: 20% in the morning improving 80% in the afternoon falling 60% in the evening.

Low cloud and visibility: Bases dropping to 500-700m in the morning lower patches, then lifting and breaking in the afternoon, mainly above tops. More extensive 750-900m in the evening. Mainly good visibility below the cloud, some temporary reductions in any light rain or showers.
